Craft Extras:

- Coffee grounds make the perfect imitation for potting soil. Just make sure they are non-percolated.
- The bench was made by gluing together various pieces of scrap wood. It was finished with one coat of Grey Age-It EASY (80879)
- Assemble a seasonal Mum by spraying one side of the Squeeze Me with a spray adhesive. Then roll that side of the Squeeze Me in one bloom color of Growies. Set it aside. Fill a pot with a plug of Oasis Floral Foam. Glue a layer of coffee grounds to the visible top surface of the Oasis. Top it off with the decorated Squeeze Me.
