Crafty Extra:

- Nina suggests "fluffing" and adjusting the tree branches to achieve optimum fullness and shape. Also, she says that you can easily unscrew the tree from its wooden base and craft your own base or stand. Nina's base is approx. 2 1/4" Sq. She also crafted her own tree topper and added snow to the branches.

Believe it or not, Nina didn't build her first dollhouse until 2021! Soon thereafter, we found her Instagram account and have had a blast collaborating with her. We have paid the utmost attention to design details while maintaining Nina's clean aesthetic.
