Crafty Extras:

- The leaves are made with an inexpensive leaf punch purchased at Michael's using tissue paper and Post-It Notes in appropriate colors. Punch several layers of the tissue at one time for best results; shape the leaves on the foam back of a mouse pad (or similar) with a smooth, round stylus or the end of a paintbrush.
- The planter for the tree is a Styrofoam disc covered with the textured paper panel #57720. Reindeer moss (#36171) fills the gaps and hides the base of the tree. (One paper panel was enough to cover the entire house foundation and the planter.)
