Crafty Extras:

- The window valence and café curtain are made from pre-gathered eyelet trim purchased at a fabric store. It was cut to length for the window and hangs from toothpicks threaded through the header on the trim.
- The brick-sheet backsplash wall was spray-painted gloss white and grouted with lightweight spackling; a scrap of #9149 basswood was used for the shelf and #81430 1/8" Quarter-Round Molding for the edge trim.
- The chrome cookware had to be modified to hang from the pot rack. We carefully drilled through the pot handles using the 1/32" drill from the #60935 Finger Drills set and made hanging loops from monofilament fishing line.
