GENERAL INSTRUCTIONS

- Read all the instructions before you begin.
- Choose a work surface that is clean, dry and protected from glue spills.
- Make sure all parts are in the kit.
- Do a dry fit, using masking tape to hold parts in place, to make sure everything fits together correctly before permanent assembly.

Tip: Plan your finishes at the dry-fit stage, before final/permanent assembly. It is easier to finish the panels as flat surfaces. Disassemble and finish as desired, then reassemble using glue.
