

#73098 Canopy Instructions

Step-by-step assembly instructions

Copyright miniatures.com 2023

SUPPLIES NEEDED:

Clear drying craft glue
Graph paper
Pin (or any pointed sharp instrument)
Small sharp scissors (or any sharp cutting instrument)

Assembly Instructions

Installing Bed Posts

1. Add glue into the two post sockets on either side of the headboard.
2. Insert a post into each post socket.
3. Place the bed frame upright with the headboard and two posts flat on the work surface. Align the posts at a right angle to the headboard. Working on graph paper can help assure that the assembly is square.
4. Let the glue dry.
5. Repeat Steps 1-4 for the remaining two posts.
6. Let the glue dry.

Installing Canopy Finales*

7. Find the hole in each of the four corners of the canopy frame.
8. From the underside of the canopy, press a pin through a hole in the canopy frame and through the canopy fabric. Lightly mark, on the top side of the canopy fabric the pin's location.
9. Repeat Step 8 for all three other holes in the canopy frame.

10. Make a very small incision ($\leq 1/8"$) in the fabric at the mark.
11. Press a finial through the incision into the hole in the canopy frame.
12. Repeat Steps 10-11 for all three other finials.
13. Remove all the finials, add glue into all fabric-canopy holes and reinsert the finials.
14. Let the glue dry.

Mounting Canopy on Posts

15. Add glue to the bottom of each finial.
16. Place the canopy on top of the bed posts and insert the bottom of each finial into the top of each corresponding post.
17. Let the glue dry.

*If the canopy fabric has wrinkled during transit, you may want to use a steamer to freshen it before installing.

 **WARNING:**
CHOKING HAZARD – Small parts
Not for children under 3 yrs.
Adult supervision required.
