Santa Boots Holiday Display

by Fran Casselman

Items used:

- #78119 Black Gardening Boots
- #74034 Multi-Grip or #5515 Omni-Stick or another glue that will bond to rubber
- Fuzzy white yarn, fleece, faux fur or felt for cuff, about 2" for each boot
- #25687 Lycopodium
- #1336 Ivy/Holly Vine
- Scrap of cardboard
- Black marker
- Metallic paint or marker (optional)

Instructions:

Glue felt/fleece to the top of each boot, leaving a small gap where the boots will touch.

Cut out two straps and color paper edges with black marker, if desired. Glue to boots (straps are longer than needed; shorten to fit). Make sure buckle position is the same for both boots.

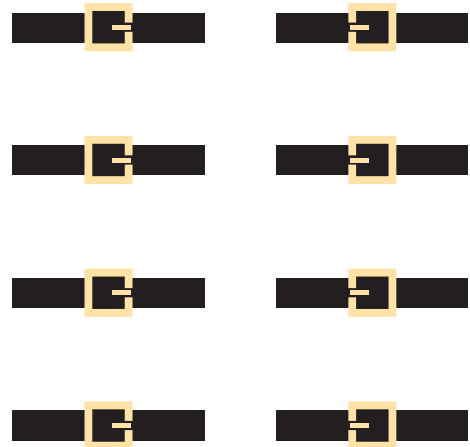

When glue is set and cuff and straps are secure, glue the boots together and to a small piece of thin cardboard. *Note: You may need to clip the boots together with a small clothespin or similar while the glue dries completely.* (This may take longer than usual, as the rubber is not absorbent.)

Trim away the excess cardboard and color the edges with black marker.

Fill with sprigs of #25687 Lycopodium and #1336 Ivy/Holly Vine as well as natural twigs with no-hole bead berries. For another look, try presents, candy canes or other holiday décor and enjoy!

Print this page on good quality thin paper at the highest resolution on your printer.

Use this printie as is, or color the buckles with metallic paint or marker.
